**Extreme Event Facilitator Certification Program
Coming in December!**

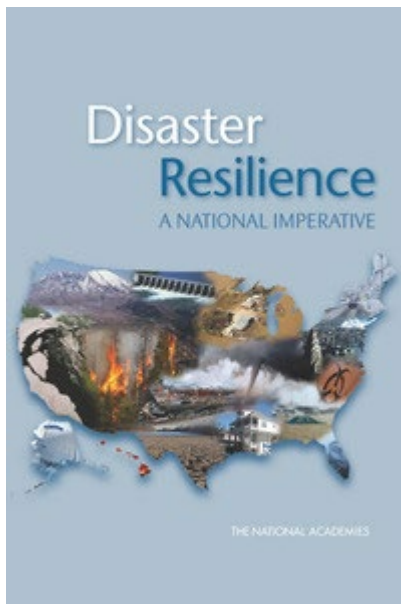

We know that due to COVID-19, preparedness and resilience has taken a unique spotlight within our communities and our classrooms. Our resources are stretched, and we need new, creative ways to empower students and members of our community with the skills they need to be champions in the face of emergencies and disasters.

LabX's Extreme Event Game was developed to help engage community members, students, and organizations in a fun and cooperative learning environment to build the knowledge and skills necessary to be resilience champions.

Starting on December 8th, you'll have the opportunity to level up your classroom, organization, and community's approach to resilience through their [Extreme Event Facilitator Certification Program](#). Join a network of emergency management practitioners and educators around the country, and build the skills needed to make preparedness fun.

To learn more about the program and be the first to know when registration opens, visit the [LabX website](#).
