Manage 2021's Top 5 Risks with Critical Event Management

The problems we faced in 2020 have carried over to the new year. In 2021, we believe there are five key risks that will impact all organizations. Our eBook offers insight into each of these risks and discusses what your organization needs to do to build resilience.

[In this eBook](#), you'll learn:

- How proactive communication through a critical communications platform can be the solution to a successful COVID-19 vaccine rollout.
- How post-pandemic success will be driven by embracing an AI and technology-led business transformation.
- The importance of accuracy in combating the "infodemic" and spread of misinformation.

Resilience Matters; Reimagining the Future in a Tumultuous Year

Review of new ebook (217pp), free from Island Press:

Reviewer: John Plodinec, Ph.D. He was the technical lead for the Community and Regional Resilience Institute and is now an independent scholar focused on community resilience. He regularly blogs at [resilientcommunities.home.blog](#).

"Laurie Mazur's third compilation of articles on urban resilience – *Resilience Matters: Reimagining the Future in a Tumultuous Year* – offers the same combination of polemics and practical solutions found in the first two. But more so than the previous volumes, this one is distinguished by several instances where authors provide conflicting views. This is actually a good thing because it forces careful readers to think through what is right for their context. ... " [Read the full review here](#).

The **NHMA Members Update!** is a monthly bulletin of the Natural Hazard Mitigation Association offering a snapshot of the latest news, events, activities, and commentary in the realm of hazard mitigation to its members. If you have any questions or believe you are receiving this bulletin in error, please contact us at nathazma@gmail.com to unsubscribe from this list.

The NHMA is a member supported 501(c)(3) educational & charitable organization composed of mitigation professionals working to promote risk reduction and mitigation and reduce the consequences of natural events, especially among the most vulnerable populations in our communities.
