## Engaging Tomorrow's Resilience Decision Makers Today

Mitigation outreach and communication often are focused on local officials, property owners, community groups and others who make mitigation decisions today. But engaging youth—tomorrow's decision makers—can pay huge dividends now and in the future.

Join us on Thursday, November 18, at 1 p.m. ET for this one-hour **Community Engagement and Risk Communication (CERC) webinar**. Learn how youth engagement can enhance your community outreach efforts and build the next generation of resilience leaders!

You'll hear from:

- Earth Force, a youth engagement nonprofit that works with a variety of organizations, including FEMA, to create experiences that engage young people as active citizens to improve the environment and their communities.
- Three CERC teams that have recently launched mitigation, preparedness and nature-based solutions experiences for youth audiences.
